

CRG

Injection accessories

CRG offers a range of accessories for both high and low pressure injection of CRG epoxy and polyurethane resins.

High pressure injection packers

Standard diameters

6mm x 45mm

8mm x 55mm

10mm x 100mm

13mm x 100mm

13mm x 150mm

13mm x 250mm

CRG high pressure injection packers can be used with either epoxy or polyurethane injection resins and have a maximum operating pressure of 500kgf. Packers come in standard sizes or hole diameters of 6mm to 13mm. Custom diameters and lengths can be supplied upon request.

Hydraulic couplers

CRG hydraulic couplers fit all standard packer sizes and have been tested to withstand high pressure injection without failure.

Syringe injectors

Operating volume: 50ml

Max. pressure: 9.1kgf

Min. pressure: 2.5kgf

CRG syringe injectors are refillable and require no power. They are suitable for use in all low pressure epoxy injection applications such as crack repair and reaffixing delaminated screeds where high pressure can not be used due to the delicate nature of the delaminated area.
